ELECTRIC, INC

# ABOUT US

## The Company

---

JTL Electric, Inc. is an electrical services company specializing in all commercial and residential service needs.

Having been a business opened since 2005, our desires drive us to succeed and deliver incomparable services to both our current and

future clients. JTL Electric, Inc. was founded, owned, and operated by a master electrician who is an expert in the industry's technical operations.

Our sole purpose is to carry on the traditional company structure with whole-heartedness, discipline, and perseverance with a keen focus on safety.

### Our Mission & Objective

Our mission is to provide exemplary service for all electrical requests or needs. Our objective is to strive and exceed all barriers and expectations of maintenance while upholding the belief of always providing quality and committed customer service to those we are servicing.

### Experienced Team

JTL Electric's master electricians, journey wiremen and apprentice wiremen service all electrical installations. With our experience and education, we are diverse in all aspects of the electrical industry and understand the importance of properly servicing and installing new service in order to fulfill the demands and safety satisfaction of today's growing customer base.

---

# OUR SERVICE

## Quality Experts

---

**Our service capabilities are centered on the foundational skills in electrical system maintenance, repair, and new service, along with mastery in those services.**

Our clients benefit from our hands-on customer service and personal touch, ensuring our clients have the necessary support to keep their properties operating at the highest levels.

Our clients expect exceptional results from us as they understand the importance of experience, education, and mastery. We are dedicated to providing customer and business safety, reliability, and the most cost-effective method to satisfy our client's electrical needs.

### PREVENTATIVE MAINTENANCE

---

JTL Electric's Preventive Maintenance Program helps our clients avoid downtime and losses due to costly equipment failures.

### REPAIR
