PROFILE

JTL Electric, Inc., founded in 2005, is headquartered in Cincinnati, Ohio. We are a certified minority full-service electrical contractor that provides exemplary assistance and quality. Our core services include commercial and residential, new construction, solar energy, certified electric vehicle infrastructure, fire alarm installation, teledata communications, and interior fit out and renovation. JTL Electric team is comprised of seasoned master electricians, journeyman wiremen, and apprentice wiremen who are talented in delivering safe, high-performance construction projects on time and within budget. As Owners' Representatives, we work closely with our clients' additional contractors and electrical suppliers, providing exceptional guidance and management services that results in outstanding project outcomes.

Our strengths are communication, collaboration, and teamwork. Our core values are a central focus to improving our clients' overall construction experience by providing outstanding customer service. Our employees strive to improve performance by incorporating the most current "standards of practice", strategies, and technologies necessary for delivering successful award-winning projects. Our professionals leverage their exceptional experience and leadership qualities to be considered valued partners throughout the project's life cycle. Our approach is to incorporate the most effective industry standards of practices, strategies, and methods that support the project, so that we can exceed our client's expectations. Our goal is to help our clients facilitate and coordinate the construction process to mitigate risks and complex problems. We bring together people who share this passion and undergird each other while creating functional built spaces.
